Reimagine efficiency and business insight

Every user benefits

Inventory managers can generate item descriptions with a single click, in any language. Team leaders gain instant access to performance and budget overrun insights, empowering them to steer projects towards success. Contract managers can leverage AI-powered analysis to compare vendor contracts, assessing risks, benefits, and key differences with ease.

Unlock the full potential of your data

Ask questions and receive instant, actionable insights that drive strategic decision-making. Optimize employee shift schedules for optimal coverage. Generate executive reports to keep stakeholders informed and aligned. The possibilities are endless, and Infor GenAI is your key to unlocking them.

Easy to deploy and scale—everywhere

Elevate day-to-day business activities across procurement, project management, operations, financials, and sales with generative AI. By leveraging AWS scalable cloud infrastructure, businesses can deploy and scale Infor GenAI to meet their evolving business needs.
